### Outbreak (other report - submitted) ( AVIGEDOR )

| Province | District | Unit Type | Location | Latitude      | Longitude     | Start date | End Date   |
|----------|----------|-----------|----------|---------------|---------------|------------|------------|
| HADAROM  | Ashkelon | Village   | AVIGEDOR | 31,7109475852 | 34,7432124102 | 22/09/2011 | 24/09/2011 |

| Species | Measuring units | Susceptible | Cases | Deaths | Destroyed | Slaughtered |
|---------|-----------------|-------------|-------|--------|-----------|-------------|
| Birds   | Animals         | 105000      | 4500  | 1500   | 103500    | 0           |

Affected Population: 5.7-week-old broilers. The flock is divided in 4 pens. All the pens were affected.

### Outbreak (other report - submitted) ( SHETULA )

| Province | District | Unit Type | Location | Latitude      | Longitude     | Start date | End Date   |
|----------|----------|-----------|----------|---------------|---------------|------------|------------|
| HAZAFON  | Acco     | Village   | SHETULA  | 33,0850249792 | 35,3123718519 | 25/10/2011 | 28/10/2011 |

| Species | Measuring units | Susceptible | Cases | Deaths | Destroyed | Slaughtered |
|---------|-----------------|-------------|-------|--------|-----------|-------------|
| Birds   | Animals         | 120000      | 15000 | 5000   | 115000    | 0           |

Affected Population: 6-week-old broilers housed in 6 adjacent pens. The mortality was seen in all the pens. All birds have been destroyed on 27 October by foam.

### Outbreak (other report - submitted) ( MA'ALE HAHAMISHA )

| Province     | District  | Unit Type | Location         | Latitude      | Longitude     | Start date | End Date   |
|--------------|-----------|-----------|------------------|---------------|---------------|------------|------------|
| YERUSHALAYIM | Jerusalem | Village   | MA'ALE HAHAMISHA | 31,8172566394 | 35,1102103322 | 01/11/2011 | 10/12/2011 |

| Species | Measuring units | Susceptible | Cases | Deaths | Destroyed | Slaughtered |
|---------|-----------------|-------------|-------|--------|-----------|-------------|
| Birds   | Animals         | 30000       | ...   | ...    | ...       | ...         |

Affected Population: Heavy breeders. No clinical signs were observed when incidental

laboratory findings were received.  
 Since the flock is within very high biosecurity and in order to be on the safe side, 450,000 eggs have been destroyed through 3 weeks.

**Outbreak (other report - submitted) ( NATUR )**

| Province | District | Unit Type | Location | Latitude      | Longitude     | Start date | End Date   |
|----------|----------|-----------|----------|---------------|---------------|------------|------------|
| HAZAFON  | Golan    | Village   | NATUR    | 32,8512555942 | 35,7521791889 | 04/11/2011 | 28/11/2011 |

| Species | Measuring units | Susceptible | Cases | Deaths | Destroyed | Slaughtered |
|---------|-----------------|-------------|-------|--------|-----------|-------------|
| Birds   | Animals         | 220000      | 40000 | 10000  | 210000    | 0           |

Affected Population 6-week-old broilers.

**Outbreak (other report - submitted) ( EN HABESOR )**

| Province | District   | Unit Type | Location   | Latitude      | Longitude    | Start date | End Date   |
|----------|------------|-----------|------------|---------------|--------------|------------|------------|
| HADAROM  | Beer-Sheva | Village   | EN HABESOR | 31,2811622361 | 34,443948576 | 04/11/2011 | 13/11/2011 |

| Species | Measuring units | Susceptible | Cases | Deaths | Destroyed | Slaughtered |
|---------|-----------------|-------------|-------|--------|-----------|-------------|
| Birds   | Animals         | 108000      | 18000 | 8000   | 100000    | 0           |

Affected Population 5-week-old broilers. The disease was diagnosed in 4 adjacent pens.

**Outbreak (other report - submitted) ( SHOMERA )**

| Province | District | Unit Type | Location | Latitude      | Longitude     | Start date | End Date   |
|----------|----------|-----------|----------|---------------|---------------|------------|------------|
| HAZAFON  | Acco     | Village   | SHOMERA  | 33,0823418446 | 35,2834522604 | 05/11/2011 | 13/11/2011 |

| Species | Measuring units | Susceptible | Cases | Deaths | Destroyed | Slaughtered |
|---------|-----------------|-------------|-------|--------|-----------|-------------|
| Birds   | Animals         | 54000       | 17000 | 2000   | 52000     | 0           |

Affected Population 6-week-old broilers housed in 3 pens.

**Outbreak (other report - submitted) ( BE'EROT YIZHAQ )**

| Province | District     | Unit Type | Location       | Latitude     | Longitude     | Start date | End Date   |
|----------|--------------|-----------|----------------|--------------|---------------|------------|------------|
| HAMERKAZ | Petach-Tiqwa | Village   | BE'EROT YIZHAQ | 32,038784133 | 34,9098997214 | 12/11/2011 | 16/11/2011 |

| Species | Measuring units | Susceptible | Cases | Deaths | Destroyed | Slaughtered |
|---------|-----------------|-------------|-------|--------|-----------|-------------|
| Birds   | Animals         | 19000       | 1000  | 100    | 18900     | 0           |

Affected Population 3-week-old broilers.

**Outbreak (other report - submitted) ( RAMAT ZEVI )**

| Province | District | Unit Type | Location   | Latitude      | Longitude     | Start date | End Date   |
|----------|----------|-----------|------------|---------------|---------------|------------|------------|
| HAZAFON  | Yizreel  | Village   | RAMAT ZEVI | 32,5898962896 | 35,4150873376 | 12/11/2011 | 28/11/2011 |

| Species | Measuring units | Susceptible | Cases  | Deaths | Destroyed | Slaughtered |
|---------|-----------------|-------------|--------|--------|-----------|-------------|
| Birds   | Animals         | 187000      | 100000 | 12000  | 168000    | 0           |

Affected Population The disease was diagnosed in three adjacent farms. The birds in the two first outbreaks were 4-week-old broilers. The birds in the first farm were culled (38,000) and the birds in the second farm were culled on 23 November 2011. The third farm included 7,000 free range organic table egg layers. The sole clinical sign was a drop in lay. These birds were culled on 22 December 2011.

**Outbreak (other report - submitted) ( ELQOSH )**

| Province | District | Unit Type | Location | Latitude      | Longitude     | Start date | End Date   |
|----------|----------|-----------|----------|---------------|---------------|------------|------------|
| HAZAFON  | Acco     | Village   | ELQOSH   | 33,0327232709 | 35,3219414525 | 15/11/2011 | 24/11/2011 |

| Species | Measuring units | Susceptible | Cases | Deaths | Destroyed | Slaughtered |
|---------|-----------------|-------------|-------|--------|-----------|-------------|
| Birds   | Animals         | 52000       | 5000  | 1000   | 51000     | 0           |

Affected Population 5-week-old broilers divided in two pens. Only one pen was affected. The two pens were culled on 24 November 2011.

**Outbreak (other report - submitted) ( MEVO HORON )**

| Province         | District | Unit Type | Location   | Latitude      | Longitude     | Start date | End Date   |
|------------------|----------|-----------|------------|---------------|---------------|------------|------------|
| JEHUDA & SAMARIA | Ramallah | Village   | MEVO HORON | 31,8487411946 | 35,0351688091 | 16/11/2011 | 27/11/2011 |

| Species | Measuring units | Susceptible | Cases | Deaths | Destroyed | Slaughtered |
|---------|-----------------|-------------|-------|--------|-----------|-------------|
| Birds   | Animals         | 85000       | 30000 | 8000   | 77000     | 0           |

Affected Population 6-week-old broilers.  
 Note by the OIE Animal Health Information Department: This

outbreak is located into Israeli Settlements in the West Bank.

**Outbreak (other report - submitted) ( TIRAT ZEVI )**

| Province | District | Unit Type | Location   | Latitude      | Longitude   | Start date | End Date   |
|----------|----------|-----------|------------|---------------|-------------|------------|------------|
| HAZAFON  | Yizreel  | Village   | TIRAT ZEVI | 32,4210439375 | 35,52738123 | 17/11/2011 | 24/11/2011 |

| Species | Measuring units | Susceptible | Cases | Deaths | Destroyed | Slaughtered |

## Final report

### Future Reporting

What further reports will be submitted in relation to this event?

The event is resolved. No more reports will be submitted.

The event is continuing. Weekly follow-up reports will be submitted.

The event is unlikely to be contained and is now considered to be endemic. No more follow-up reports will be made, but instead, information about this disease will be included in the future six-monthly reports.

### Submit OIE reports

Are you ready to officially submit this report to OIE?

Yes. The report is ready for submission

No. Save the report as a draft for future editing and submission.
