Rabies Laboratory –RFFIT test

At the Rabies Laboratory we perform the Rapid Fluorescent Focus Inhibition Test (RFFIT) to quantitate antibody levels to the rabies virus in human and animals.

Specimen Requirement

Approximately 2 ml of serum, without preservatives. The serum should be placed in container with ice packs.

Interpretation

The world health organization (WHO) recommends that feline and canines being exported to Israel and from July 4, 2004 to all the European community countries have minimum titer of 0.5 international units (I.U) using the RFFIT method.

Processing Time

All RFFITs are initiated on Monday and Wednesday. The results are usually ready after 7 working days. The results will be forwarded by fax or e-mail according to the details which are written in the attached form.

Payments

The fee is 328 NIS (1-10 samples) or if submitted using electronic form 282 NIS see link:

http://www.vetserv.moag.gov.il/NR/rdonlyres/7D50F8CB-A8E4-4852-9880-CD4F2D6790DB/0/Instr_Tofes_RFFIT.pdf

Payment can be done by using a credit card.

see link:

<http://ecom.gov.il/Counter/general/homepage.aspx?counter=51&catalog=1&category=rabies&language=he>

Please fill the attached form and send it to fax number indicated. Kindly be advised that, the payment will be charged only after the samples arrival.

The fee may be changed from time to time.

Other Important Information

Please send the complete testing form request stamped by the veterinarian with your specimen and the import permit attached to this form.

Samples send by courier should be addressed:
